PANIC ATTACK: THE PHASES

CLINICAL OVERLAP

This overlap leads many patients to mistake panic for a heart attack.

Wave: differential diagnosis at the wrist

15-25% of presentations for **chest pain** are actually due to **panic** or **acute anxiety**.

Admission as
Red / Orange
Code

Discharge as White
Code following
negative diagnostic
tests.

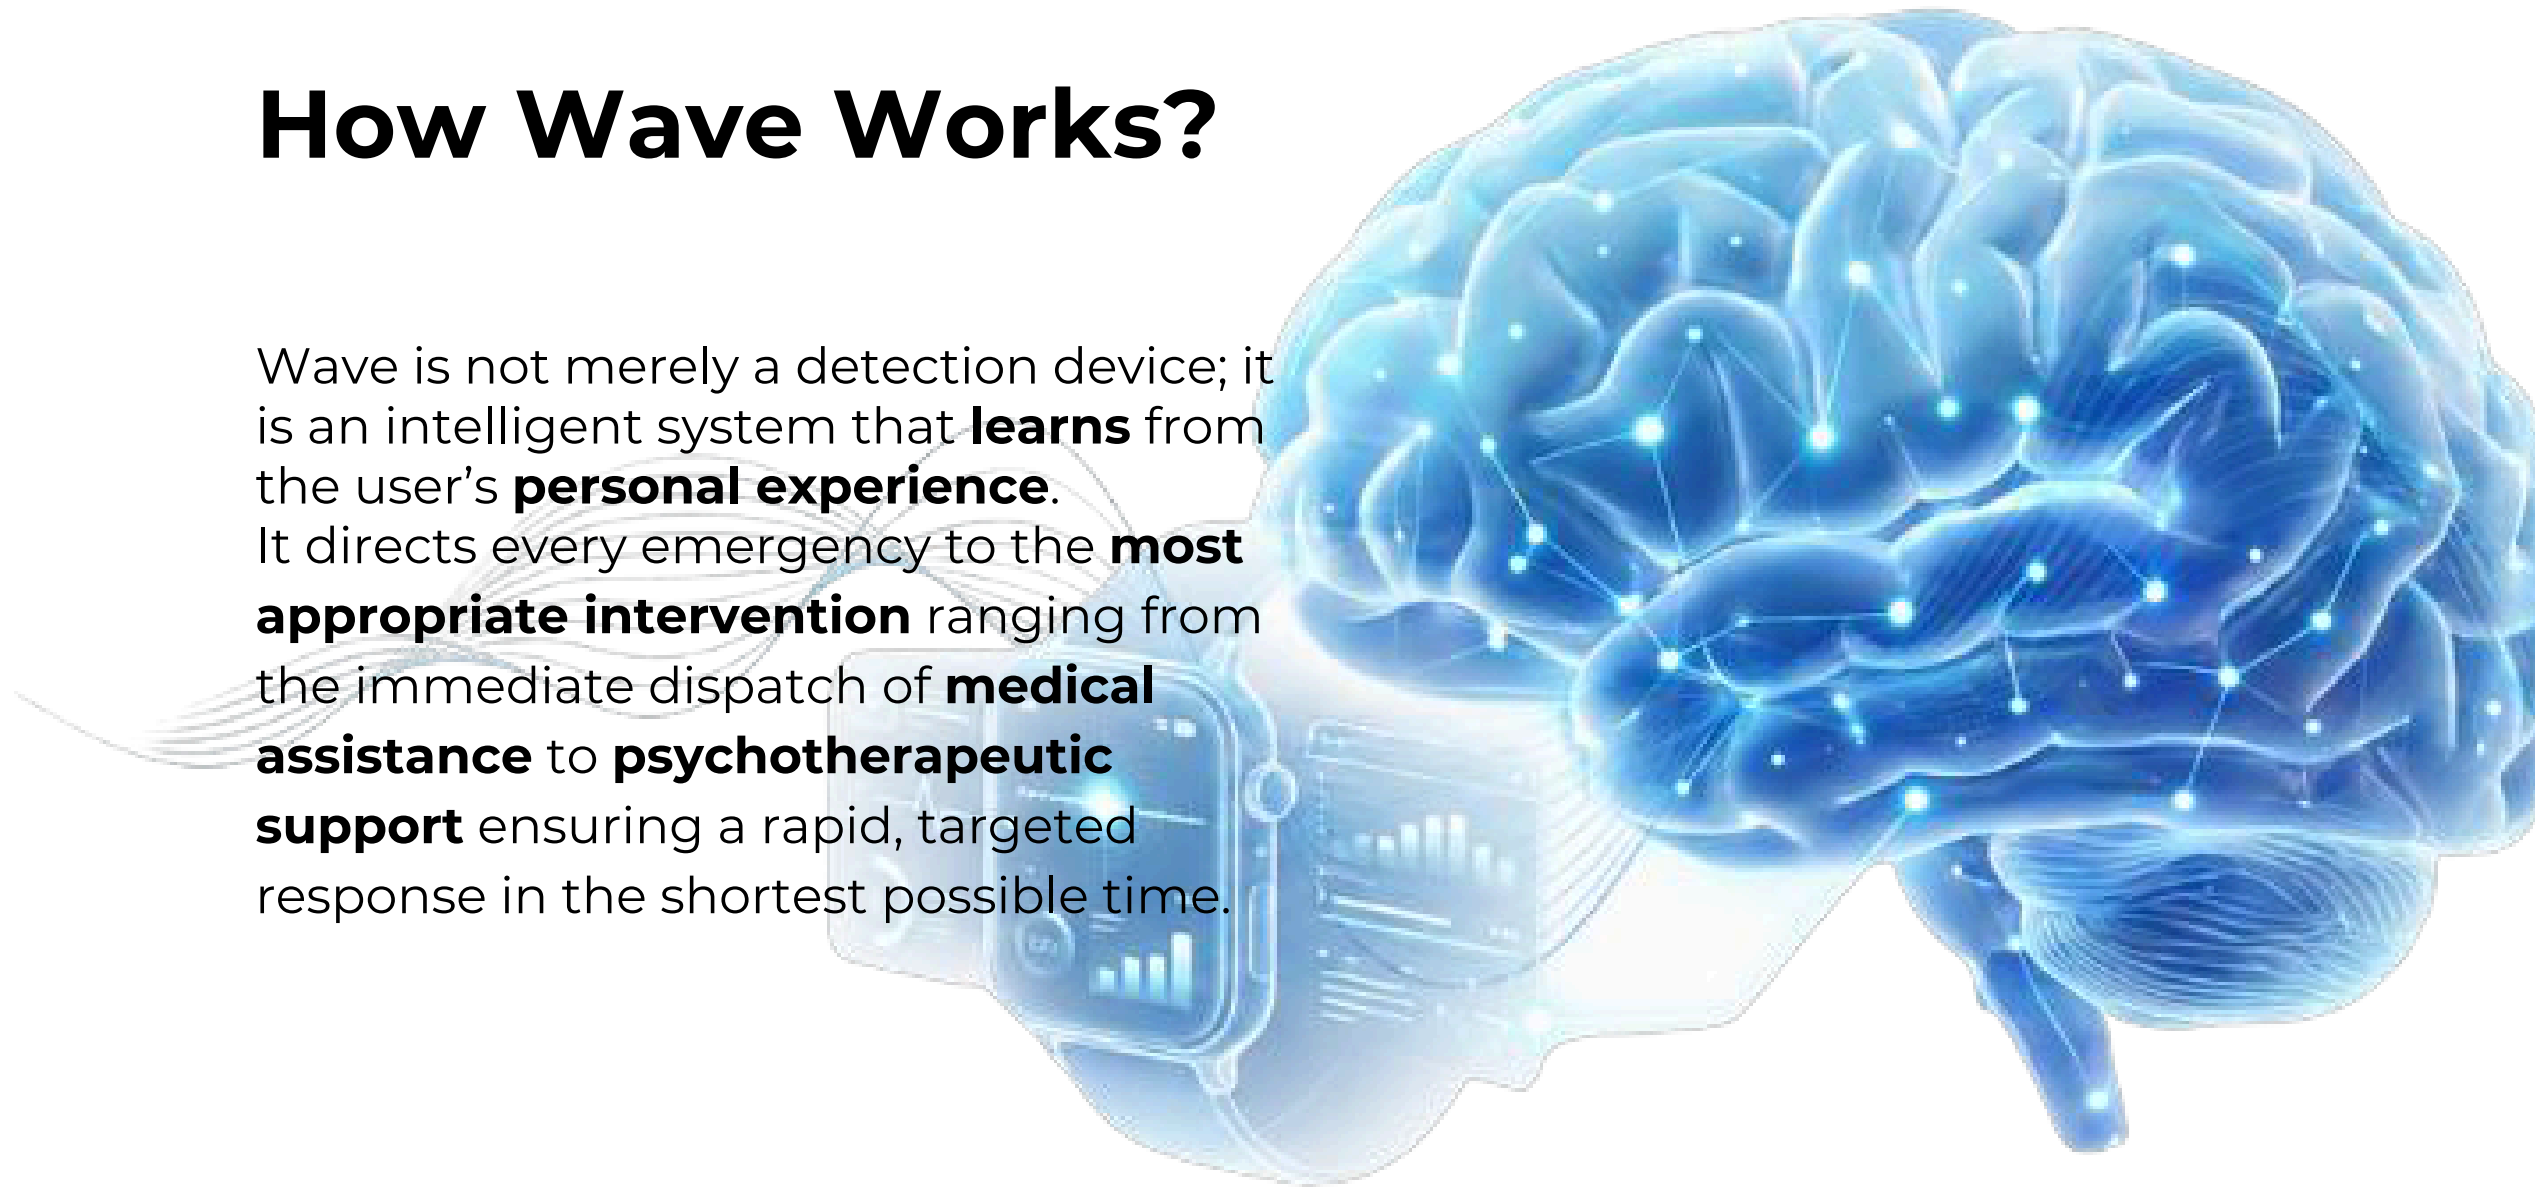

wave: differential distance at the wrist

The **smart system for smartwatches** that monitors your vital signs and can **distinguish** between a panic attack and cardiac arrest, enabling the **right intervention** at the right time.

How Wave Works?

Wave is not merely a detection device; it is an intelligent system that **learns** from the user's **personal experience**. It directs every emergency to the **most appropriate intervention** ranging from the immediate dispatch of **medical assistance** to **psychotherapeutic support** ensuring a rapid, targeted response in the shortest possible time.

WAVE.
